## MEASURE GUIDE

**1** Measure the width of the door opening on the inside face of the brickmould on each side: top, center & bottom. Record the shortest measurement.

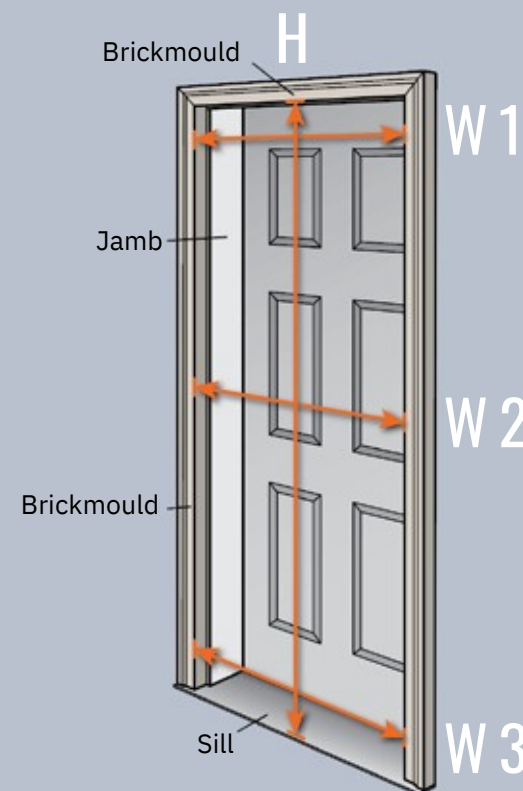

**2** Measure the height from the top of the door sill to the under-side of the brickmould at the top.

**3** The box sweep at the bottom of the storm door allows a  $\frac{1}{2}$ " expansion. The door will be manufactured to allow a  $\frac{1}{4}$ " adjustment up or down from the measurement provided.

**4** Choose the door handing
